EDUCATION

Shadan College of Engineering & Technology
Bachelor of Technology in Computer Science - 7.37 CGPA

Hyderabad, TG / India
June. 2020 – June 2024

EXPERIENCE

EDMISSIONS.APP

Software Developer Intern

Hyderabad, TG / India
December 2023 – March 2024

- Developed a full-stack web application using PHP, HTML, CSS, JavaScript, and MySQL for an Ed-Tech start-up.
- Implemented E-Mail OTP-based authentication, reducing manual errors and improving security for 500+ users.
- Designed UI elements for students, institutions, and companies, enabling efficient access to essential data for 500+ users across students and clients.
- Created role-based content management, abstracting sensitive data and improving user experience for 500+ users.

EdVenture Park

Hardware Team Intern

Hyderabad, TG / India
May 2023 – November 2023

- Developed IoT-based home automation devices, integrating Arduino Uno, ESP32, ESP8266 and ultrasonic sensors to automate lighting and curtains for 50+ clients.
- Built an Attendance Management System using ESP32, RFID technology, and Google Sheets, automating attendance for 200+ students across multiple sessions.
- Led 3 workshops, training 100+ students in microcontroller usage (Arduino, ESP32, ESP8266) and guiding them through practical IoT projects.

PROJECTS

Library Management System | Java, MySQL, JDBC

- Designed and implemented a Library Management System to manage books, students, and borrowing activities, featuring separate roles for students (view, borrow, return books) and librarians (add books, track borrowed books).
- Implemented MySQL database to store book, student, and borrowing records, ensuring data consistency and integrity through JDBC connectivity.
- Built a console-based interface for seamless user interaction, demonstrating strong problem-solving and efficient system design skills.

Fake News Detection | NodeJS, ExpressJS, HTML/CSS

- Designed and developed the complete frontend interface using HTML and CSS, focusing on responsive layout, usability, and clean UI structure. Managed the backend using Express.js, handling routing and server logic.
- Integrated a pre-built machine learning model into the application by creating API endpoints and ensuring efficient data flow between frontend and backend.
- Implemented form handling, input validation, and dynamic content rendering for improved user interaction.

SKILLS

- **Languages:** Java, PHP, HTML/CSS
- **Databases & Tools:** SQL, MongoDB, JDBC
- **Libraries:** BootStrap, Material-UI
- **Developer Tools:** Git, Docker, IntelliJ IDEA, Visual Studio Code
